

I collaborate with architects, builders and artisans in the community to identify materials and methods of building that are sustainable. Using this knowledge, I build settings for my film, assembling teams that work to build small-scale renewable energy infrastructure. These are intended to provide electricity and wi-fi to a community, while behaving as an education hub for youth to learn about Ecology.

# THREEESTUDIOS

## Ecological Architecture + Community Power

### CITIZEN ARTIST

My artistic practice directly relates to the communities that I work within. I work with a small community, identifying connections between needs. Usually, it is for a single purpose ie. one goal.

In finding a solution, I look at the materials available and incorporate local youth.

I am very interested in renewable energy and communication technology. My work ultimately involves the construction of small-scale renewable energy technology that local youth are able to access, learn from and eventually install themselves.

As a citizen artist, I make cinema that inspire local youth to think about Ecology and their Environment.

### THREEESTUDIOS

@ The Centre for Social Innovation

215 Spadina Avenue, Suite 400 Toronto, CANADA M5T 2C7 +1 (416) 407-0919

@ CeRCCa

C Mare de Deu dels Dolors 10, Llorenc del Penedes, TA 43712 +34 667 264 771

Using the film production process, I build permanent sets that become renewable energy generators and schools for the communities I shoot my film in

MY NEXT PROJECT INVOLVES  
THE RESTORATION AND  
REFURBISHING OF PEDRA  
SECA BARRAQUES IN  
PENEDES

# Where we BUILD

Toronto - Catalunya - Philippines - Mongolia

## PAST/FUTURE WORK

**S W E D E N**  
Sponsored by Nokia and the University of Stockholm, I have researched renewable energy technology and social innovation models

**P H I L I P P I N E S**  
Have built a model for bamboo domes in the jungle which will support solar panels

**C A T A L U N Y A**  
Begun the construction of my first solar/wi-fi hub in Artes, Catalunya

**C A N A D A + G E R M A N Y**  
Commissioned to perform my opera that builds a solar sculpture in its performance

**M O N G O L I A**  
Designing the construction of a solar installation for an orphanage just outside of Ulan Batar.
